Mr. Fraley informed the Society that a petition for a new transcription, called for by the French Minister of Finance, had been duly executed and forwarded to Paris, and that

the Minister of Finance had authorized a new transcription on the books of the office at Paris.

Mr. Briggs addressed the Society, urging some action for applying the Magellanic funds to the rewarding of discoverers and inventors who did not apply for the premium.

Mr. Fraley thereupon gave a short history of the original bequest, the accumulation of the extra fund, the legal opinion of Mr. Horace Binney respecting its use, its application by the Society to publication, the establishment of the extra-Magellanic premium, the publication of other premiums, and the appointment of a committee on premiums at large.

On motion it was

*Resolved*, That the Board of Officers and Members in Council be requested to take into consideration the present regulations in regard to the award of the Magellanic Premium, and to report, if they may deem any change expedient, such modifications as may lead to the awarding of said Premium for objects of scientific discovery mentioned in the original donation.

And the meeting was adjourned.

*Obituary Notice of Dr. John Neill. By Dr. Brinton.*

(*Read before the American Philosophical Society, Nov. 5, 1880.*)

Among the numerous surgeons of distinction who have given lustre to medical science in Philadelphia, the late Dr. Neill deservedly stood in the front rank. He came of a race of physicians, his father and both his paternal and maternal grandfathers having been members of that profession. He was born in Philadelphia, July 9th, 1819, and received both his academic and medical degrees from the University of Pennsylvania, the latter in 1837. The whole of his subsequent life was passed in this city, where he soon acquired large surgical and general practice. At various periods he occupied prominent positions in relationship to his profession. It will be sufficient to mention the leading ones of these. As early as 1845 he was appointed Demonstrator of Anatomy in the University of Pennsylvania, and thirty years later, Professor of Clinical Surgery in the same institution. For several years after 1864, he was Professor of General Surgery in the medical department of Pennsylvania College, an educational organization not now in existence. At various epochs he was surgeon to the Pennsylvania Hospital, to the Philadelphia Hospital, to Wills Hospital, and Consulting Surgeon to the Presbyterian Hospital.

During the war of the Rebellion, especially in its earlier years, he was actively engaged in rendering professional services to the wounded soldiery.
